## Table of Contents Pre-Algebra/Algebra

<b>Class 1</b>	Evaluating numerical and variable expressions
<b>Class 2</b>	The real numbering system Adding and subtracting real numbers (with different signs)
<b>Class 3</b>	Combining like terms and distributive property
<b>Class 4</b>	Adding and subtracting fractions (with variables)
<b>Class 5</b>	Multiplying and dividing fractions (with variables) Dividing polynomials by monomials or polynomials (long division)
<b>Class 6</b>	Solving multi-step equations (including inequalities) Rewriting equations and formulas (solving for a variable)
<b>Class 7</b>	The language of math (word problems) Translating variable expressions
<b>Class 8</b>	Coordinate planes, scatter plots, tables mid-point and distance formulas
<b>Class 9</b>	Linear equations: Slope (parallel and perpendicular lines) <ul style="list-style-type: none"><li>• <math>x/y</math> intercepts</li><li>• Standard Form : <math>Ax + By = C</math></li><li>• Slope-intercept Form : <math>y = mx + b</math></li><li>• Point-slope form : <math>y - y_1 = m(x - x_1)</math></li></ul>
<b>Class 10</b>	Functions, matrices, powers, and exponents (including negative exponents)
<b>Class 11</b>	Multiplying and factoring polynomials Quadratic equations and the quadratic formula
<b>Class 12</b>	Radical expressions and system of linear equations (equations with 2 variables)
